Elevate NXT is the next step in promotional apparel. With the garments of Elevate NXT, we follow the supply chain from the source to the branding. Made of recycled polyester or organic cotton, our Elevate NXT styles are truly sustainable. And of course, they have all the qualities you have come to expect from an Elevate product: designed for branding and super comfortable to wear. And as we believe that the branding on a product is as much a part of it as the buttons or the zipper, the inks used for the branding are certified too! The inks used are sustainable and free of any harmful chemicals – meaning they do not contain hazardous substances for humans. Available in six popular promotional colours and our special Elevate NXT blue, this really is the next step in promotional apparel: certified from yarn to inks!

WHAT IS GOTS?

The GOTS –Global Organic Textile Standard– is the worldwide leading textile processing standard for organic fibres. This standard also includes ecological/ environmental (f.e. energy, water, wastewater and chemical use) and social criteria. The entire textile supply chain is backed up by independent certification and traceability is key in this process.

The Global Organic Textile Standard aims to define worldwide recognised requirements that ensure the organic status of textiles - from harvesting of the raw materials through environmentally and socially responsible manufacturing up to labelling – in order to provide a reliable assurance to the end consumer.

With one certification accepted in all major markets – textile processors and manufactures are enabled to export their organic yarns, fabrics and garments.

Certified by Control Union
CU 1019665

WHAT IS GRS?

The GRS –Global Recycled Standard– is an international, voluntary full product standard that sets requirements for third-party certification of recycled content, chain of custody, social and environmental practices and chemical restrictions.

The standard aims to meet the needs of companies looking to verify the recycled content of their (both finished and intermediate) products. Also GRS is intended to verify responsible social, environmental and chemical practices in production.

The objectives of the Global Recycled Standard are to define requirements that ensure good working conditions and accurate content claims, as well as minmising harmful environmental and chemical impacts. This includes companies involved in ginning, spinning, weaving, knitting, dyeing, printing and stitching in more than 50 countries.
